LILY'S FIELD – Android games and release date 02/04/2019 from gaming touchscreen companies. Game Genre: Puzzle. In the article, we summarize pumped tips from TOP players, developed answers to game questions, guides for beginners from the official site and our secrets to passing the game. Carefully, the article periodically updated, looks at the site Wise Geek more frequently. Lily's Garden: Puzzle Guide How to get through the puzzle? Every level in the game is a puzzle. Solve it, you get to the next. To pass, click the screen a green arrow indicating the current level. Work. In pizza, you need to complete tasks, the sense that is to collect certain items. For example, at level 38 (see screenshot), you need to collect five packs and seeds and weight pills. To do that, you need to combine and remove the playing field headings in the same color next to the stakes, as well as moving down the wrapping field and seeds. The fee is counted when the number is required in the items collected. The tasks on the levels are different. The higher the level, the harder the work. Encrypt when solving a puzzle, temply will come in handy. You can use all or several amplifiers in your arsenal, having already labeled them needed in the window before starting the level. If the Shovel and Rake amplify available to you are on, you can buy them directly from the game for gold coins. Their movement. The number of movements per limited level – never forget that! The remaining moves are displayed on the right side of the screen, above the items that you need to collect. Foreign objects on the playing field. Their role is to prevent the player from moving the tiles and, according to, building the necessary combinations. Foreign objects, such as dandelions, disappear from the field when using the pan and amplify rockets or when making combinations of tiles in the same color next to them. Completion level. When you successfully complete the task, you get a star for the passage of the coin and gold. The less the move you spend on solving the puzzle, the more gold coins you'll receive at the end. I lost the level. In this case, you can either complete the level again by clicking Render Headers or Buy 5 More Moves for a Certain Amount of Coin and Try to Win. Lily's Garden: Secret Level 1. Stack heading from top to bottom! So you get the opportunity to make much-needed combinations as possible, including those that form the print! If you act the other way around, then your combinations will get stuck in tiles in other colors, thereby preventing the combination from coming together. 2. The duration of enduring life can't be delayed! Keep this in mind if you win the bonus of endless life in the action and want to leave the game for a while. Even with the phone coming back, countdown to their lives endless is endless. So try taking this bonus by yourself when you plan to they play further. This is the only way you can take full advantage of the bonus! You have to admit that their continual life is great. Especially at hard levels. 3. Use wisely encrypt. It's very hard to get tempered – they rarely drop out. And the further you play, the harder levels they puzzle will be. Use bombs, rockets, magic bottles and others only on really tough levels, when you can't go further and continue to develop the track. The beneficiary usage of chilli will lead you to become stuck in the draw and will be forced to buy them for real money in an in-game store. 4. Amplifier on the field is playing - as a last resort. When you see that there are many moves left in the puzzle, or any of them won't lead to the desired combination of tiles, turn on amplified them! Don't use them on the field playing just like that, wait for a really unfavorable situation, when you just cant do without help. As in any other puzzle, strategy is important here, and it means waiting for those right moments and making counter-moves only when it is really needed. 5. Combine the encryption. If you use two mailons at once, for example, a pan with a magic bottle, then the effect will be intra. You might even complete the level right away. Try to make sure the amplified ones spread across the field are played up together. Tough, but you'll love the result No. 6. take your time. These kastete games don't need to fill in any given time, and therefore take your time. Think about your actions, think that logically, don't waste your movement. Try to predict where the tiles are two or even more steps ahead. It all depends on your strategy, the ability to make the necessary combinations and calculate the chance to collect the necessary items in some moves. Remember – the more movements you end up with, the more coins you get. Lily's Garden: Amp Guide What is amplifier for? Amplifier helps you quickly complete the task at the level, while spending less moving. How to get amplifier? Encrypt becomes available as you progress through the game. Some of them can be used ready-made from the Arsenal and created independently on the playing field (bombs, flares, bottles magic). The other amplified can be taken only to the Arsenal side, they can't be created on the playing field (picks, fees). Rocket Reinforcement Type. To create a Rocket amplified on the playing field, click a title group of the same color with the image of a rocket, and the tiles will disappear, leaving one amplified in its place. A rocket allows you to remove a single row of tiles in a column or column (depending on its location). Bomb. To create a Bomb, click a title group of the same color and its image. The resulting encryption can once remove all the headings located next to it. The magic bottle. To create a magic bottle, combine ten or more titles of the same color with the image in a spiral. The magic bottle removes all headings of the same color of the player Picks. A spatula is an indisponsible tool to remove unnecessary tiles from the playing field, for example, when one tile in one color prevents one title group to another from joining together. Using a spatula, you can pry a unwanted tile and remove it. Try to use the power paddle when the number of game moves ends. rake. Using a rake, you can simultaneously remove one column and the column headings. Just click one of the tiles and use the rack to remove the column and column where this heading is located. When you use Shovel and Rake to lighten up, gaming games aren't wasted. What will happen after, you don't know. The game itself can be compared to the series, the action in which takes place before your eyes. 4. Beautiful puzzle. A few words about them. All the games are different, beautifully drawn and accompanied by interesting details: dandelions that need to be removed from the playing field, or bees stolen from flower flowers, etc. Watching this design, certainly made and loved for the game, is very nice.
